

Upon completion of this degree from KSU, students will be able to:

1. Examine career paths to becoming licensed as an architect in the United States and the range of available career opportunities that utilize the discipline's skills and knowledge.
- 2.

8. Foster practices of social equity and inclusion to develop deepened understandings of diverse cultural and social contexts and translate these understandings into built environments that equitably support and include people of different backgrounds, resources, and abilities.
9. Apply knowledge of the impact of the built environment on human health, safety, and welfare in the built environment at multiple scales, from buildings to cities, to make informed design decisions within architectural projects, while prioritizing the well-being of participants and communities.
10. Develop effective technical knowledge required to identify and describe the established and emerging systems, technologies, and assemblies of building construction, and use appropriate methods and criteria to assess those technologies against the design, economics, and performance objectives of projects.
11. Apply design synthesis aptitudes toward holistic design-thinking, problem-solving, and performance-based decision-making within architectural projects while demonstrating the synthesis of user requirements, regulatory requirements, site conditions, accessible design, and consideration of measurable socio-environmental impacts.
