

Southern Poly. College of Eng. and Eng. Technology

Upon complet on of this degree from KSU, students will be able to:

Select and apply advanced concepts and principles to solve complex problems in a specialty area appropriate to the pract ce of civil engineering.

Develop an appropriate design alternat ve for a civil engineering project that considers realist c requirements and constraints.

Apply concepts and principles of stat st cal modeling and probabilist c analysis to assess risk, uncertainty and reliability in civil engineering.

Conduct literature review in a specialty area appropriate to the pract ce of civil engineering.

Ef ect vely communicate, both verbally and in writ en form.
